## Quiz: How Much Do You Know About Social Security Retirement Benefits?

Social Security is an important source of retirement income for millions of Americans, but how much do you know about this program? Test your knowledge, and learn more about your

retirement benefits, by answering the following questions.

### Questions

**1. Do you have to be retired to collect Social Security retirement benefits?**

- a. Yes
- b. No

**2. How much is the average monthly Social Security benefit for a retired worker?**

- a. \$1,360
- b. \$1,493
- c. \$1,585
- d. \$1,723

**3. For each year you wait past your full retirement age to collect Social Security, how much will your retirement benefit increase?**

- a. 5%
- b. 6%
- c. 7%
- d. 8%

**4. How far in advance should you apply for Social Security retirement benefits?**

- a. One month before you want your benefits to start.
- b. Two months before you want your benefits to start.
- c. Three months before you want your benefits to start.

**5. Is it possible for your retirement benefit to increase once you start receiving Social Security?**

- a. Yes
- b. No

### Answers

**1. b.** You don't need to stop working in order to claim Social Security retirement benefits. However, if you plan to continue working and you have not yet reached full retirement age (66 to 67, depending on your year of birth), your Social Security retirement benefit may be reduced if you earn more than a certain annual amount. In 2017, \$1 in benefits will be deducted for every \$2 you earn above \$16,920. In the calendar year in which you reach your full retirement age, a higher limit applies. In 2017, \$1 in benefits will be deducted for every \$3 you earn above \$44,880. Once you reach full retirement age, your earnings will not affect your Social Security benefit.

**2. a.** Your benefit will depend on your earnings history and other factors, but according to the Social Security Administration, the average estimated monthly Social Security benefit for a retired worker (as of January 2017) is \$1,360.<sup>1</sup>

**3. d.** Starting at full retirement age, you will earn delayed retirement credits that will increase your benefit by 8% per year up to age 70. For example, if your full retirement age is 66, you can earn credits for a maximum of four years. At age 70, your benefit will then be 32% higher than it would have been at full retirement age.

**4. c.** According to the Social Security Administration, you should ideally apply three months before you want your benefits to start. You can generally apply online.

**5. a.** There are several reasons why your benefit might increase after you begin receiving it. First, you'll generally receive annual cost-of-living adjustments (COLAs). Second, your benefit is recalculated every year to account for new earnings, so it might increase if you continue working. Your benefit might also be adjusted if you qualify for a higher spousal benefit once your spouse files for Social Security.

For more information, visit the Social Security Administration website, [ssa.gov](http://ssa.gov).

## Key Retirement and Tax Numbers for 2017

Every year, the Internal Revenue Service announces cost-of-living adjustments that affect contribution limits for retirement plans, thresholds for deductions and credits, and standard deduction and personal exemption amounts. Here are a few of the key adjustments for 2017.

### Retirement plans

- Employees who participate in 401(k), 403(b), and most 457 plans can defer up to \$18,000 in compensation in 2017 (the same as in 2016); employees age 50 and older can defer up to an additional \$6,000 in 2017 (the same as in 2016).
- Employees participating in a SIMPLE retirement plan can defer up to \$12,500 in 2017 (the same as in 2016), and employees age 50 and older will be able to defer up to an additional \$3,000 in 2017 (the same as in 2016).

### IRAs

The limit on annual contributions to an IRA remains unchanged at \$5,500 in 2017, with individuals age 50 and older able to contribute an additional \$1,000. For individuals who are covered by a workplace retirement plan, the deduction for contributions to a traditional IRA is phased out for the following modified adjusted gross income (AGI) ranges:

	2016	2017
<b>Single/head of household (HOH)</b>	\$61,000 - \$71,000	\$62,000 - \$72,000
<b>Married filing jointly (MFJ)</b>	\$98,000 - \$118,000	\$99,000 - \$119,000
<b>Married filing separately (MFS)</b>	\$0 - \$10,000	\$0 - \$10,000

**Note:** The 2017 phaseout range is \$186,000 - \$196,000 (up from \$184,000 - \$194,000 in 2016) when the individual making the IRA contribution is not covered by a workplace retirement plan but is filing jointly with a spouse who is covered.

The modified AGI phaseout ranges for individuals making contributions to a Roth IRA are:

	2016	2017
<b>Single/HOH</b>	\$117,000 - \$132,000	\$118,000 - \$133,000
<b>MFJ</b>	\$184,000 - \$194,000	\$186,000 - \$196,000
<b>MFS</b>	\$0 - \$10,000	\$0 - \$10,000

### Estate and gift tax

- The annual gift tax exclusion remains at \$14,000.
- The gift and estate tax basic exclusion amount for 2017 is \$5,490,000, up from \$5,450,000 in 2016.

### Personal exemption

The personal exemption amount remains at \$4,050. For 2017, personal exemptions begin to phase out once AGI exceeds \$261,500 (single), \$287,650 (HOH), \$313,800 (MFJ), or \$156,900 (MFS).

**Note:** These same AGI thresholds apply in determining if itemized deductions may be limited. The corresponding 2016 threshold amounts were \$259,400 (single), \$285,350 (HOH), \$311,300 (MFJ), and \$155,650 (MFS).

### Standard deduction

These amounts have been adjusted as follows:

	2016	2017
<b>Single</b>	\$6,300	\$6,350
<b>HOH</b>	\$9,300	\$9,350
<b>MFJ</b>	\$12,600	\$12,700
<b>MFS</b>	\$6,300	\$6,350

**Note:** The 2016 and 2017 additional standard deduction amount (age 65 or older, or blind) is \$1,550 for single/HOH or \$1,250 for all other filing statuses. Special rules apply if you can be claimed as a dependent by another taxpayer.

### Alternative minimum tax (AMT)

AMT amounts have been adjusted as follows:

	2016	2017
<b>Maximum AMT exemption amount</b>		
<b>Single/HOH</b>	\$53,900	\$54,300
<b>MFJ</b>	\$83,800	\$84,500
<b>MFS</b>	\$41,900	\$42,250
<b>Exemption phaseout threshold</b>		
<b>Single/HOH</b>	\$119,700	\$120,700
<b>MFJ</b>	\$159,700	\$160,900
<b>MFS</b>	\$79,850	\$80,450
<b>26% on AMTI* up to this amount, 28% on AMTI above this amount</b>		
<b>MFS</b>	\$93,150	\$93,900
<b>All others</b>	\$186,300	\$187,800

\*Alternative minimum taxable income

## Why Diversification Matters

**Diversification and asset allocation are methods used to help manage investment risk; they do not guarantee a profit or protect against investment loss.**

When investing, particularly for long-term goals, there is one concept you will likely hear about over and over again — diversification. Why is diversification so important? The simple reason is that it helps ensure that your risk of loss is spread among a number of different investments. The theory is that if some of the investments in your portfolio decline in value, others may rise or hold steady, helping to offset the losses.

### Diversifying within asset classes

For example, say you wanted to invest in stocks. Rather than investing in just domestic stocks, you could diversify your portfolio by investing in foreign stocks as well. Or you could choose to include the stocks of different size companies (small-cap, mid-cap, and/or large-cap stocks).

If your primary objective is to invest in bonds for income, you could choose both government and corporate bonds to potentially take advantage of their different risk/return profiles. You might also choose bonds of different maturities, because long-term bonds tend to react more dramatically to changes in interest rates than short-term bonds. As interest rates rise, bond prices typically fall.

### Investing in mutual funds

Because mutual funds invest in a mix of securities chosen by a fund manager to pursue the fund's stated objective, they can offer a certain level of "built-in" diversification. For this reason, mutual funds may be an appropriate choice for novice investors or those wishing to take more of a hands-off approach to their portfolios. Including a variety of mutual funds with different objectives and securities in your portfolio will help diversify your holdings that much more.

*Mutual funds are sold by prospectus. Please consider the investment objectives, risks, charges, and expenses carefully before investing. The prospectus, which contains this and other information about the investment company, can be obtained from your financial professional. Be sure to read the prospectus carefully before deciding whether to invest.*

### Diversifying among asset classes

You might also consider including a mix of different types of asset classes — stocks, bonds, and cash — in your portfolio. Asset allocation is a strategic approach to diversifying your portfolio. After carefully considering your investment goals, time horizon, and risk tolerance, you would then invest different percentages of your portfolio in targeted asset classes to pursue your goal.

### Winning asset classes over time

The following table, which shows how many times during the past 30 years each asset class has come out on top in terms of performance, helps illustrate why diversifying among asset classes can be important.

	Number of winning years, 1987-2016
Cash	3
Bonds	5
Stocks	10
Foreign stocks	12

Performance is from December 31, 1986, to December 31, 2016. Cash is represented by Citigroup 3-month Treasury Bill Index. Bonds are represented by the Citigroup Corporate Bond Index, an unmanaged index. Stocks are represented by the S&P 500 Composite Price Index, an unmanaged index. Foreign stocks are represented by the MSCI EAFE Price Index, an unmanaged index. Investors cannot invest directly in any index. However, these indexes are accurate reflections of the performance of the individual asset classes shown. Returns reflect past performance and should not be considered indicative of future results. The returns do not reflect taxes, fees, brokerage commissions, or other expenses typically associated with investing.

The principal value of cash alternatives may fluctuate with market conditions. Cash alternatives are subject to liquidity and credit risks. It is possible to lose money with this type of investment.

The return and principal value of stocks may fluctuate with market conditions. Shares, when sold, may be worth more or less than their original cost.

U.S. Treasury securities are guaranteed by the federal government as to the timely payment of principal and interest, whereas corporate bonds are not. The principal value of bonds may fluctuate with market conditions. Bonds are subject to inflation, interest rate, and credit risks. Bonds redeemed prior to maturity may be worth more or less than their original cost.

The risks associated with investing on a worldwide basis include differences in financial reporting, currency exchange risk, as well as economic and political risk unique to the specific country.

Investments offering the potential for higher rates of return also involve higher risk.

### Are you ready to retire?

Here are some questions to ask yourself when deciding whether or not you are ready to retire.

#### *Is your nest egg adequate?*

It may be obvious, but the earlier you retire, the less time you'll have to save, and the more years you'll be living off your retirement savings. The average American can expect to live past age 78.\* With future medical advances likely, it's not unreasonable to assume that life expectancy will continue to increase. Is your nest egg large enough to fund 20 or more years of retirement?

#### *When will you begin receiving Social Security benefits?*

You can receive Social Security retirement benefits as early as age 62. However, your benefit may be 25% to 30% less than if you waited until full retirement age (66 to 67, depending on the year you were born).

#### *How will retirement affect your IRAs and employer retirement plans?*

The longer you delay retirement, the longer you can build up tax-deferred funds in traditional IRAs and potentially tax-free funds in Roth

IRAs. Remember that you need taxable compensation to contribute to an IRA.

You'll also have a longer period of time to contribute to employer-sponsored plans like 401(k)s — and to receive any employer match or other contributions. (If you retire early, you may forfeit any employer contributions in which you're not fully vested.)

#### *Will you need health insurance?*

Keep in mind that Medicare generally doesn't start until you're 65. Does your employer provide post-retirement medical benefits? Are you eligible for the coverage if you retire early? If not, you may have to look into COBRA or an individual policy from a private insurer or the health insurance marketplace — which could be an expensive proposition.

#### *Is phasing into retirement right for you?*

Retirement need not be an all-or-nothing affair. If you're not quite ready, financially or psychologically, for full retirement, consider downshifting from full-time to part-time employment. This will allow you to retain a source of income and remain active and productive.

### What happens to my property if I die without a will?

If you die without a will, your property will generally pass according to state law (under the rules for intestate succession). When this

happens, the state essentially makes a will for you. State laws specify how your property will pass, typically in certain proportions to various persons related to you. The specifics, however, vary from state to state.

Most state laws favor spouses and children first. For example, a typical state law might specify that your property pass one-half or one-third to your surviving spouse, with the remainder passing equally to all your children. If you don't have children, in many states your spouse might inherit all of your property; in other states, your spouse might have to share the property with your brothers and sisters or parents.

But not all property is transferred by will or intestate succession. Regardless of whether you have a will, some property passes automatically to a joint owner or to a designated beneficiary. For example, you can transfer property such as IRAs, retirement plan benefits,

and life insurance by naming a beneficiary.

Property that you own jointly with right of survivorship will pass automatically to the surviving owners at your death. Property held in trust will pass to your beneficiaries according to the terms you set out in the trust.

Only property that is not transferred by beneficiary designation, joint ownership, will, or trust passes according to intestate succession. You should generally use beneficiary designations, joint ownership, wills, and trusts to control the disposition of your property so that you, rather than the state, determine who receives the benefit of your property.

Even if it seems that all your property will be transferred by beneficiary designation, joint ownership, or trust, you should still generally have a will. You can designate in the will who will receive any property that slips through the cracks.

And, of course, you can do other things in a will as well, such as name the executor of your estate to carry out your wishes as specified in the will, or name a guardian for your minor children.
